

Blanke•CUBELINE

(Aluminum • Stainless steel)

Blanke•CUBELINE is a sleek new tile edge protector that complements popular contemporary tile and stone designs. Unlike traditional edge protectors, this profile features a symmetrical “cube” shape. Several stunning finishes are available which allow the Blanke•CUBELINE to accent a wide range of tile designs and joint colors. In addition to its decorative properties, the Blanke•CUBELINE also provides a durable protective edge for tile and stone applications. The chemical resistant stainless steel version even can be used as stairnose.
