

Blanke•Corner Angle

(Stainless steel)

The Blanke•Corner Angles are designed where tiled wall corners need to be protected after installation from mechanical impact. The angles are manufactured using 1/25" thick, low gloss polished, stainless steel (material 1.4301 – V2A) and with protective foil. A foil protects the corner from scratches prior to installation. The Blanke•Corner Angles adhere directly to the wall tile using double backed glue strips.
