

Blanke•FLOOREX

(PVC)

NEW

Newly-designed plastic expansion joint profile with no visible support legs and low gloss finish that more closely resembles actual grout joints. The vertical legs of the Blanke•FLOOREX consist of a durable hard PVC while the upper and lower expansion zones are made from soft and highly-flexible PVC.

Match the Blanke•FLOOREX colors to the Blanke•CORNEX sanitary cove.

Blanke•Surface Expansion Joint

(PVC)

The Blanke•Surface Expansion Joints are manufactured from coextruded rigid and soft PVC. It is used in tiled floors where absorption of compression, shear and tensile stress is required. The PVC material is resistant to weather and UV rays, as well as most household cleaning products such as salt solutions, diluted acids and chlorinated water. It can be used for interior and exterior applications. For heavy load and high traffic areas, we recommend the Blanke•Heavy Duty Expansion Joint shown on page 46.
