BLANKE PROFILES MADE OF V4A

Prices 2019

*Durable beauties
made of V4A
Stainless Steel*

Whether in the wonderful hotel swimming pool in Italy or the dream holiday apartment in the South of France, ceramics are traditionally a very popular floor covering where the building materials are particularly exposed to the wind, water and the sun. Naturally, the accompanying tile accessories need to be as equally robust and hard-wearing as the ceramic floors. This is true not only for typical

holiday regions, but rather for any locations with comparable climatic conditions, such as public swimming pools* and wellness facilities.

That is why we now also offer V4A stainless steel profiles for the series BLANKE CUBELINE, BLANKE STEPLINE, BLANKE CORN-E, BLANKE QUARTER CIRCLE TILE TRIM and BLANKE COR-

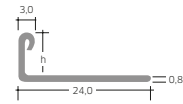

BLANKE EDGE PROTECTOR TRIM

NER ANGLES straight from stock in addition to our high-quality V2A profiles along with our BLANKE EDGE PROTECTOR TRIM.

As truly durable beauties, BLANKE PROFILES made of V4A stainless steel combine not only aesthetic appeal and elegance but also ruggedness and permanent resistance to corrosion. In other words,

precisely those properties that are decisive for creating a stylish ambience. BLANKE profiles made of high-quality and robust V4A stainless steel retain their functionality even when exposed to the most extreme conditions and the need to meet the highest demands. Thanks to excellent manufacturing standards and aesthetically shaped profiles, the attractive floor covering trims are simply a sight to behold.

*Consult the Application Technology team at Blanke before using the product in conjunction with saline solutions.
